## **DETAILED ACTION**

### ***Specification***

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Claim Objections***

3. Claim 1 is objected to because of the following informalities:

Claim 1, line 6 change "make dielectric layer have the LC value" to --form the dielectric layer having a LC value (leakage current)--. Appropriate correction is required.

### ***Allowable Subject Matter***

4. Claims 1-20 would be allowable if rewritten or amended to overcome the objection(s) forth in this Office action.

Art Unit: 2831

5. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach or suggest (taken in combination with the other claimed features) a method comprising producing fine electrically defective portions in the dielectric layer so as to form a dielectric layer having a LC value of 500 A/m<sup>2</sup> or less per surface area of the electrical conductor and forming the semiconductor layer on the dielectric layer by electrification (claims 1-20).

### ***Conclusion***

6. This application is in condition for allowance except for the following formal matters:

Applicant must amend claim 1, and abstract to overcome the rejection of record.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5,428,500 – solid electrolytic capacitor.
